

FAASTeam presents:

# **Mid Air Collision Avoidance and Special Use Airspace**

Tyndall Air Force Base Mid Air Collision Avoidance (MACA) presentation will remind everyone where you can expect to encounter high speed military aircraft in the local flying area.

The Air Force mission is to defend the United States through control and exploitation of air and space. Tyndall Air Force Base, the only F-22 training wing, is teaming with high performance military aircraft flight training. To keep the freedom we enjoy every day in the United States it takes the best trained military in the world. Much of that flight training is occurring in the Bay County Area in the world's finest, most sophisticated high speed aircraft.

Tyndall AFB MACA program will give you improved situational awareness of local air traffic control, local military aircraft, training operations and what you can do to avoid meeting one of our finest military aviators by accident. The military operation areas (MOAs), restricted areas, warning areas, and Tyndall's Class D airspace will be discussed in sufficient detail to give everyone a clear understanding of why they have been established. It is imperative for air safety that we all understand and obey the rules. Come refresh your knowledge and learn something new as we review the Tyndall Air Force Base mission.

## Event Details

**Sat, Jun 1, 2013 - 10:00 am**  
**Sheltair, Panama City, Northwest**  
**Florida Beaches Int'l Airport**  
5325 Johnny Reaver Road,
